SATURDAY, June 2-F. M. Gold has been very strong all day-opening at 141 and lesing at 1412, after selling at 1412. Government Bonds were firmer, with a fair business in

8.20s at 1021 21021 for coupon, and 1021 for registered bonds; 7-30s, second series, sold at 102%. The miscellanesus share list was firm, with small transactions. Mariposa preferred sold as high as 25; Cary Improvement Co., 17; Boston Water Power was active and sold at 52?. The Mailway market opens firm; New-York Central, 99; Erie, 6, with a moderate business; but after the call the marsure to sell; New-York Central sold at 97 ; Erie, 60 ; Beading, 108; Michigan Southern, 80, but later in the day prices improved and the market closed steady. The nt of business transacted has been very small, and the ression of the stock Exchange thinly attended; Erie is active borrowing demand, and deliveries are made with reat irregularity. The balance of the list begins the effect of the financial troubles of he Eric Company, and a disposition to sell has been noticeable for the last few days. The general public are as yet unable to understand the condition of its fairs, and await further developements. The earnings of the road for the last five months have not been suffisent to pay the running expenses and interest by several s now valuable for delivery, but as soon as the short interest is covered must go much lower, as no divi-Send can be paid on the Common shares, and that of the Preferred is more than doubtful. The market closes dull at quotations: Canton, 60] 261; Cumberland Coal, 45; 2 46; Manposa Preferred, 23; 224; Quicksilver, 52; 252; 10 per cent. As an illustration of the generally collapsed state of the various monetary institutions of the South, the condition of the affairs of the Bank of Virginia has just been made public. The assets of this bank consist of Confederate bends and stocks to the amount of \$3,216,119, and \$157,098 eein. Among the liabilities are: Capital stock,

be coin. Among the liabilities are: Capital stock, an important case, involving the responsibility of bankers for special deposits was tried at Cincinnati, before Judge Storm and Jury on monday last. An action was brought by W. H. Vandewater and wife against Larkin, Fox & Company, bankers, to recover \$1,000, the value of two seven-thirty bonds for \$500, alleged to have been left as a special deposit, in the bank of the defendants. It is claimed by Mr. Vandewater that the bonds were the property of his wife, that he left them there on special deposit on the lith of June, 1865, having facioned them in an envelope, on which was written the name of his wife, and the amount inclosed—\$1,000, that afterward, on the lith of September, he called for them, and they could not be found, and the defendants refused to pay him their value. The jury were charged by the judge, that if the property had been lost so as to prevent defendants from having it their power to restore it, they were not responsible; but the jury murt be slearly satisfied in the matter. It was not a case in which they were to be governed by conjecture. It should appear not only that the defendants could not restore the property, but that the defendants could not restore the property, but that the defendants could not restore the property, but the transfer of the demand.

be the absorbing topic of discussion, both by the newspapers and the speculating public. An evening cotemporary is distressed to think that the Company had not applied to some other source for funds. The facts of the case are, that no one else would lend the money on the security offered, and any person who desires to do so can have any part of the loan effected, on the same terms granted to Mr. Drew. The directors who would be supposed to be best posted as to the merits of the concern, as yet have shown no disposition to take any part of the load and its

Tholmoney market to-day was moderately active, but there was no material change in its condition. The demand for disseants continues quite active, and the market is comfortably aless—prime paper being readily passed at 10 per cent, per cassum, and assecued-class names generally rejected. The Pottsville Journal of Saturday says:

The quantity of coal sent by railroad this week is 22,101 tuns: by canal, 40,507 tuns; for the week, 132,688 tuns against 20,468 tuns for the corresponding week last year. The aluments this week full short of those of hint week from this County about 2,000 tuns. In addition to the above from 2,000 to 10,000 tuns of coal are sent from the Senuyikiil Coal Region via the Lehigh and Mahanoy Railroad, but this quantity is partly behanced by the supplies received from the Shamokin Region via the Mine Hill Railroad. The demand for coal is good and prices are firm, but we have not lestrued of any advance in prices in this region. On the Lehigh it is said lump has advanced about 25 cents a tha in consequence of a scarcity caused by the turnous, which, up to last accounts, continued at a large number of the collieries. Schuyikiii County, however, appears to be making up what they less. The trade sams up this week as follows compared with last year:

Work. Total. 81.788 2,866,163 216,859 1,278,977

The shipments continue very heavy, the supply for the week exceeding the shipments of the corresponding week last year 216,829 time, with the supply from the Pennsylvania Coal Company almost totally cut off, and also from the Lehigh considerably diminished. So far the increased supply this year renches 1,278,977 times. Should nothing occur to check the trade, the increased supply this year will rench 2700,000 time. It is the low prices of coal, as much as anything clar, that are so largely increasing the consumption. One of our correspondents writes, that the practice of some operators in sending coal to market unsold, tends more to keep the prices of coal unprofitable than all other causes combined. This is true, and ought to be discouraged as much as possible. Even if they have sales for some sizes, and not for all, it would be much better to stock the coal than to send it to market unsold. It is believed that on the first of July the rates of toil and transportation will be inforcated, and we therefore continue to advise all those who can to buy their supplies of coal at the present time. The Quakake or Lehigh and Mahanoy Railroad has been extended to Mount Carmel, and the connections will soon be made to send coal from the Samokin Region via Lehigh Valley Railroad to New York.

The Boston Journal of Saturday says:

The money market is abundantly supplied, and call loans are new officed at satisfactory rates to the borrowers. Discounts are somewhat lower in rate. The very best has been passed a fraction under 5 per cent, and very good names at 64 to 7 per cent. Governments are very strong. Prices have made a fractional advance. The market continues active for the small Mining shares. The rush to bey those that have advanced was not so great, and many were disposed to realise profits, so that on the whole they closed rather dull. The better class of mining shares are steady.

A. Y. Wholesale Prices of Country Produce.

For the Wess Ending Jane 2, 1866.

IExpressly for the N. Y. Thinuss by our own Reporter.

The following are the current rates of articles in good condition, as said by commission houses at wholesale. Shippers receive 5 to 10 P cent leas, deducted for commissions, beside freight and other charges. Parties receiving produce to sell, offen with the request that immediate returns be made, cannot always obtain the prices which transient buyers pays to pay. Our figures are intended more for the farmer than the nerchant, and we prefer not to disappoint by giving the outside prices of very choice articles.
